

Recycling Matters for Us as Christians...

And Recycling starts with us

- It starts with small choices we make every day.
- It's an important way we can show care for our World.
- Recycling means we choose not to waste God's gift of natural resources.
- Our recycling keeps trash out of our rivers, creeks and oceans.
- It keeps trash out of landfills, reducing air pollution and protecting soils.
- And recycling saves energy!
- Because Minnesotans are among the best recyclers in the nation, only about 25 – 30% of waste material goes to landfill.
- Recycling helps protect the environment for our children, grandchildren, and future generations.
- And it creates jobs for thousands of workers who are dedicated to protecting our environment.

But we can always do better. Learn what can and can't be recycled, choose reusable products, and choose wisely to reduce waste at the source.
